Please find below and/or attached an Office communication concerning this application or proceeding.

DETAILED ACTION

1. This is the third office action for application No. 10/823, 126 responsive to Applicant's amendment filed 01/13/06 and 03/17/06 which has been entered. This application contains 9 claims numbered 17-25. Claims 1-16 have been canceled. Claims 17-25 have been added.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 13, 2006 and March 17, 2006 have been entered.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action

Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by US patent No. 6,203,109 to Bergsten et al.

Bergsten et al. teaches a sliding arm substantially as claimed in claim 17 which includes a main body (see marked up copy) having a long guide groove extending in a longitudinal direction, a movable portion at least partially in the long guide groove and movable in the longitudinal direction and rotatable at a selected end position of the

Art Unit: 3632

longitudinal groove, wherein said main body is composed of a case main body provided with the long guide groove, and a lid portion provided with a long guided hole communicating with the long guide groove, and wherein said movable portion composed of a head portion, a guide leg portion and bearings .

FIG. 34

FIG. 35

FIG. 36

Claims 17-18 are rejected under 35 U.S.C. 102(e) as being anticipated by US patent No. 6,488,244 to Ruant et al.

Ruant et al. teaches a sliding arm substantially as claimed in claim 17, which includes a main body (see marked up copy) having a long guide groove extending in a longitudinal direction, a movable portion at least partially in the long guide groove and movable in the longitudinal direction and rotatable at a selected end position of the longitudinal groove, wherein said main body is composed of a case main body provided with the long guide groove, and a lid portion provided with a long guided hole communicating with the long guide groove, and wherein said movable portion composed of a head portion, a guide leg portion and bearings .

As to claim 18, Ruant et al. also teaches the long guide groove having a guide recess and a stopper protrusion provided in said guide recess portion.

Art Unit: 3632

Allowable Subject Matter

4. Claims 19-25 are allowed with the following reasons: Either Bergsten et al discloses or suggests for example: a pair of arresting means slidably biased in mutually opposite direction to sandwich a portion of the movable portion (claim 19); and/or an elastic means for slidably biasing the arresting plates against each other (claims 20-25) in combination with other limitations as a whole which is not found in Bergsten et al. or Ruant et al. either singularly or in combination to anticipate or render obvious the above claims.

Response to Arguments

5. Applicant's arguments with respect to claims 17-25 have been considered but are moot in view of the new ground(s) of rejection.

This action is made NON-FINAL>
